

Drug safety - a difficult mountain to climb?

Harten Group delivers pharmacovigilance services.

Over 16 years we have been trouble shooting and providing consulting expertise to drug safety teams.

Interim QPPVs, pharmaceutical physicians and senior drug safety managers can also be provided.

Call me for a confidential discussion.

Dr Vernon Harten-Ash.

A European generics company had received three critical findings at a recent Pharmacovigilance inspection.

The CEO believed that commercial operations were at risk if remedial actions were not taken prior to the re-inspection. After a radical review carried out by Harten Group, restructuring of operations and essential client training, the repeat inspection passed without any major or critical findings. The inspectors reported they were delighted with the company's improvement.
